wardha

PERSONAL PROJECTS

Food Delivery Website (03/2024 - Present)

- This project is a React-based web application for ordering food online. Users can browse through different food categories, add items to their cart, and proceed to checkout to place orders. The system also includes authentication functionality for user login and signup.

E-Commerce Website (02/2024 - 03/2024)

- This web application is designed to showcase a variety of sneakers and facilitate easy online purchases. Whether you're a sneaker enthusiast or simply looking for stylish footwear, Sneaker Store has something for you.

Weather Website (02/2021 - 02/2024)

- Weather App is a simple web application that allows users to check the weather conditions of any city around the world. With real-time updates and intuitive design, users can quickly get the latest weather information wherever they are.
